

SPARE PARTS

DRIVE UNITS

- Electrical
- Hydraulic
- NORSOK
- ATEX

BEARINGS & SEALS

- Spherical bearings
- Intermediate bearings
- Stuffing boxes
- Simmer rings

ROTORS & SEGMENTS

- Carbon Steel S235/S355
- Stainless steel AISI 304/316
- Rotors with or without central shaft

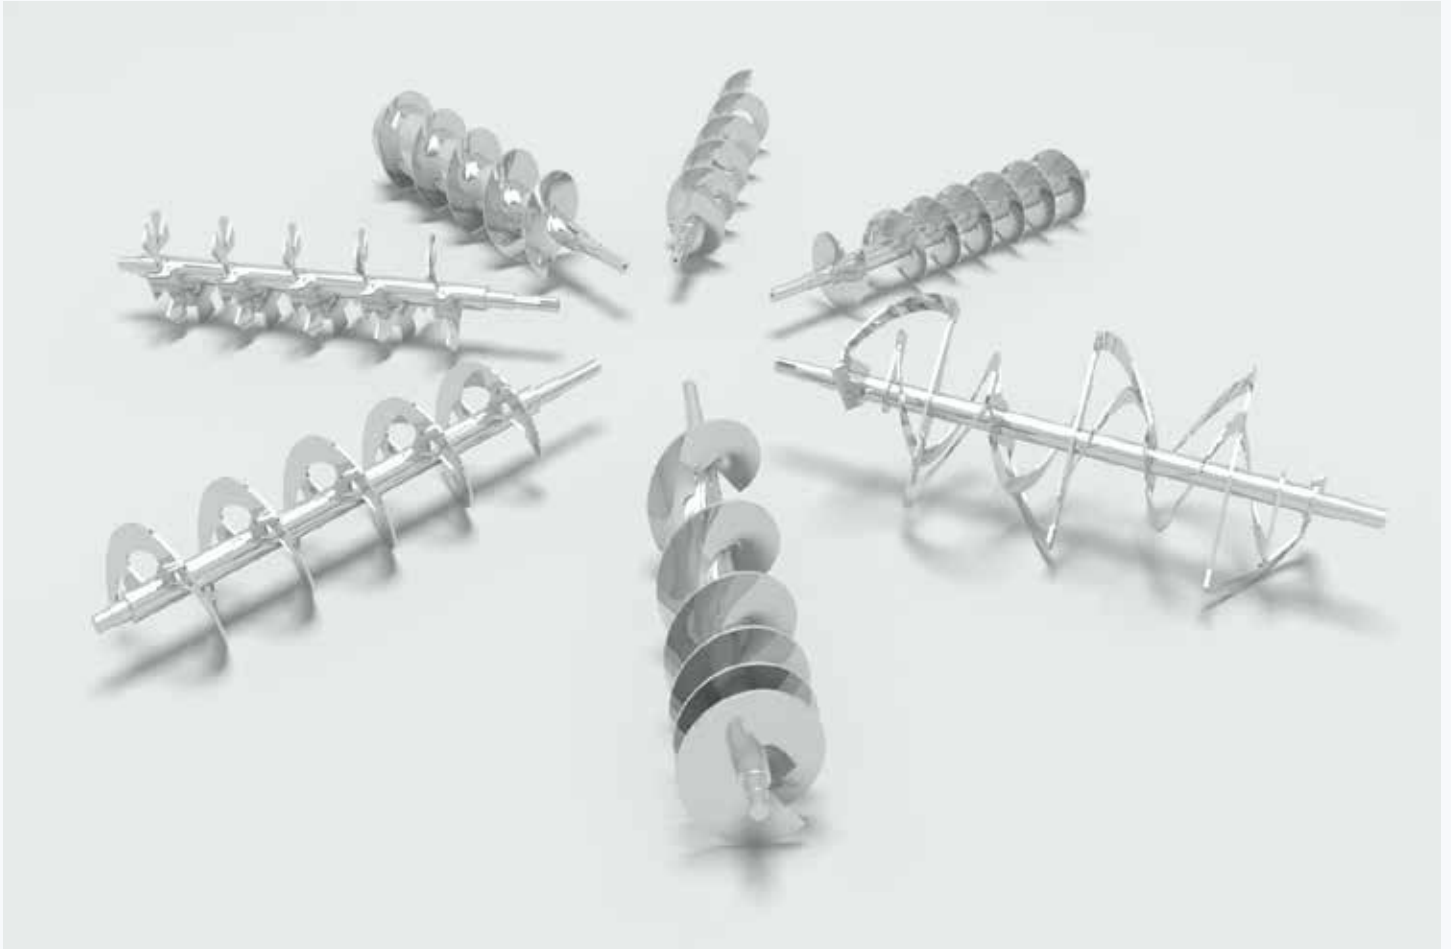

SPARE PARTS

For all machines we send a list of spare parts and consumables, along with documentation.

This list gives a good overview of spare parts with item numbers for whoever may need to order replacement parts. Since each machine is unique, it is composed of special parts which must be taken into account for varying delivery times of such parts. In those situations where disruption has major consequences, it may be appropriate to have such spare parts in stock.

The rotor is the core of every screw conveyor, which depending on wear must be replaced from time to time. Design and materials are based on over 50 years experience with various applications in most industries.

SIMMERRING	NORSOK	Gearmotors
Thread segment	ISO	Direct starters
Packing cords	Hydraulic	ATEX
PLC	Stuffing boxes	Drives

Relevant Consumables

- High quality and energy efficient gear motors from reputable suppliers
- Available with aseptic gear motors
- Flanges for easy assembly
- Motors with low consumption
- Trough manufactured in stainless steel and food industry approved material AISI304 / AISI316 or other materials on request
- Conical or straight rotors manufactured in carbon steel, AISI304 /316 or other materials as desired.
- Strainers and screens with custom sized opening.
- Intermediate, sliding bearings.
- Compact actuators
- Frequency converters for drives
- Drain plugs
- Full variety of sectional flights
- Centerless Screws
- Rotors
- Shafts
