Delivery time

1 – 2 weeks

Applications

Recycling
Slaughterhouse
Agriculture

VÅGEN MICRO SHREDDER – VMK 1500

Vågen's custom-developed micro shredder for small tasks!

The VMK1500 is our compact micro grinder, ideal for applications like smolt or other processes with lower capacity requirements. This machine can easily be adapted to your specific needs, with adjustable knives and gaps for optimal performance. An inlet hopper with a lid made of durable AISI 316 stainless steel and a limit switch are also available as additional options.

The machine utilizes proven technical solutions to reduce maintenance costs and simplify access to spare parts. We can also provide the necessary start-up applications and control systems, including frequency control for speed regulation and optimal operation, tailored to your specifications.

IN-STOCK SHREDDERS

This shredder is kept in stock for our customers. All standard spare parts are kept in stock for fast deliveries.

TYPE	DIMENSION INLET	EFFECT	CAPACITY
VMK 1500	306,5 x 256mm	1,5-7,5kW	0-1m ³ /h
