

Vågen Bucket Elevator

VÅGEN BUCKET ELEVATOR

Vågen Bucket Elevators are manufactured in a robust, industrial design that ensures efficient transportation of products within the grain and feed industry, breweries, malt houses, as well as granulates from other industries. Our bucket elevators for feed factories are equipped with high efficiency buckets, heavy-duty industrial belts, and self-cleaning bucket wheels as standard.

The cup elevator can also be supplied with additional equipment for monitoring speed and misalignment of the bucket belt, as well as backstop brakes, air extraction units, filters, bottom hoppers, explosion protection, and oil- and grease-resistant belts.

DIMENSIONS AND CAPACITY

TYPE	CAPACITY	LIFTING HEIGHT	BELT WIDTH
E-type	0-1000 t/hour	0-60 meters	150-1200mm

Gear motor

Material Types

AISI 316, 304, Painted Carbon Steel

Buckets

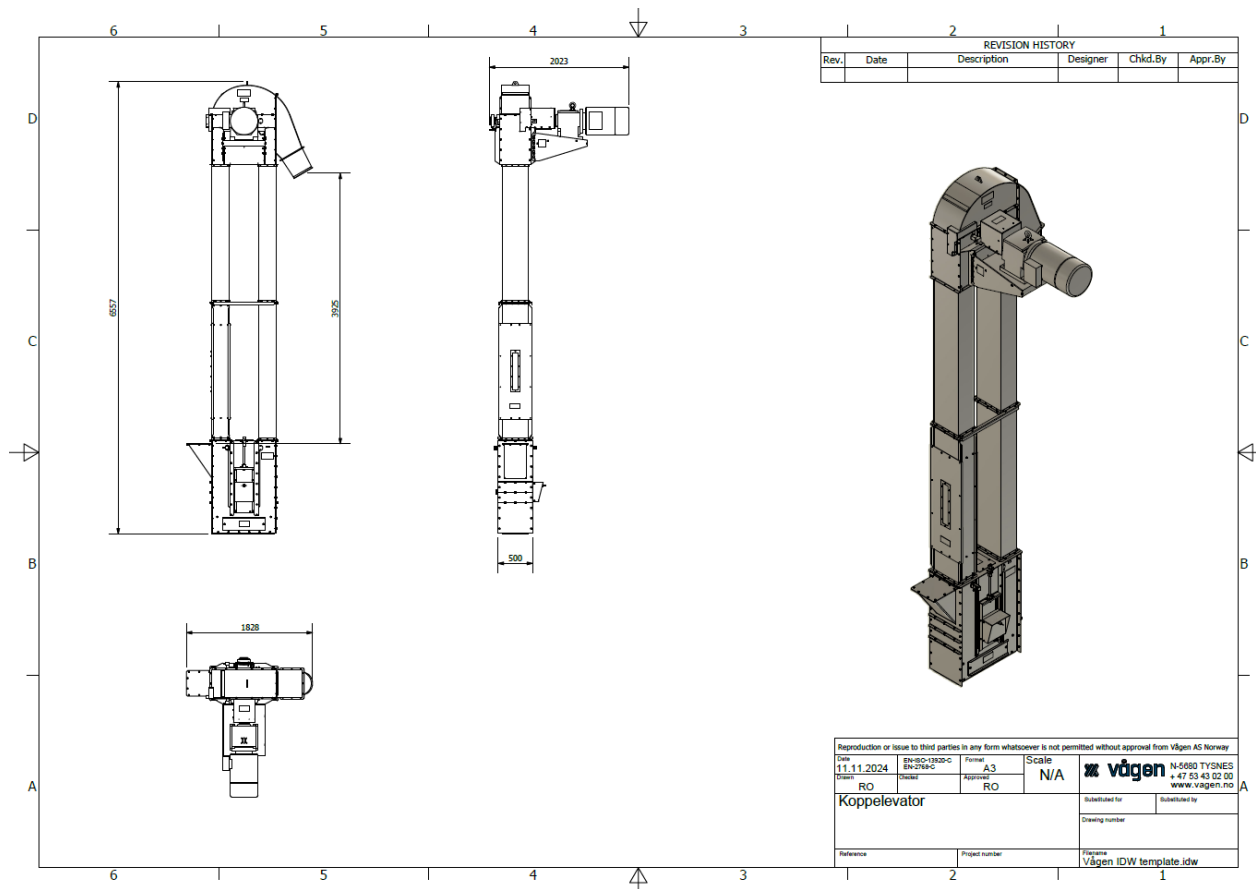

Supplied in PEHD or Stainless Steel

Delivery Time

12-14 weeks

Applications

Recycling
Slaughterhouses
Agriculture
Fishing

GENERAL INFORMATION

- Standard components
- Energy-efficient drive units from SEW Eurodrive with high quality.
- Capacity up to 1000 tons per hour
- Lifting height up to 60 meters
- Can be supplied with explosion protection system
- Can be supplied with service platforms and ladders
- Stocked spare parts
- System adaptations
- CE marked and in accordance with the Machinery Directive
- ATEX certification
- Explosion protection and explosion-limiting systems
- Spot filter
- Belt scrapers and effective cleaning solutions
- Motor brake system
