

Vågen Sand Separator

Gear Motor

SEW Eurodrive
Others brands available upon request

Rotor

Carbon steel, AISI 304/316
Other qualities available upon request

Trough

Carbon steel, AISI 304/316

Delivery Time

12-14 weeks
Larger solutions may result in longer delivery times

Applications

Recycling
Treatment plants
Agriculture

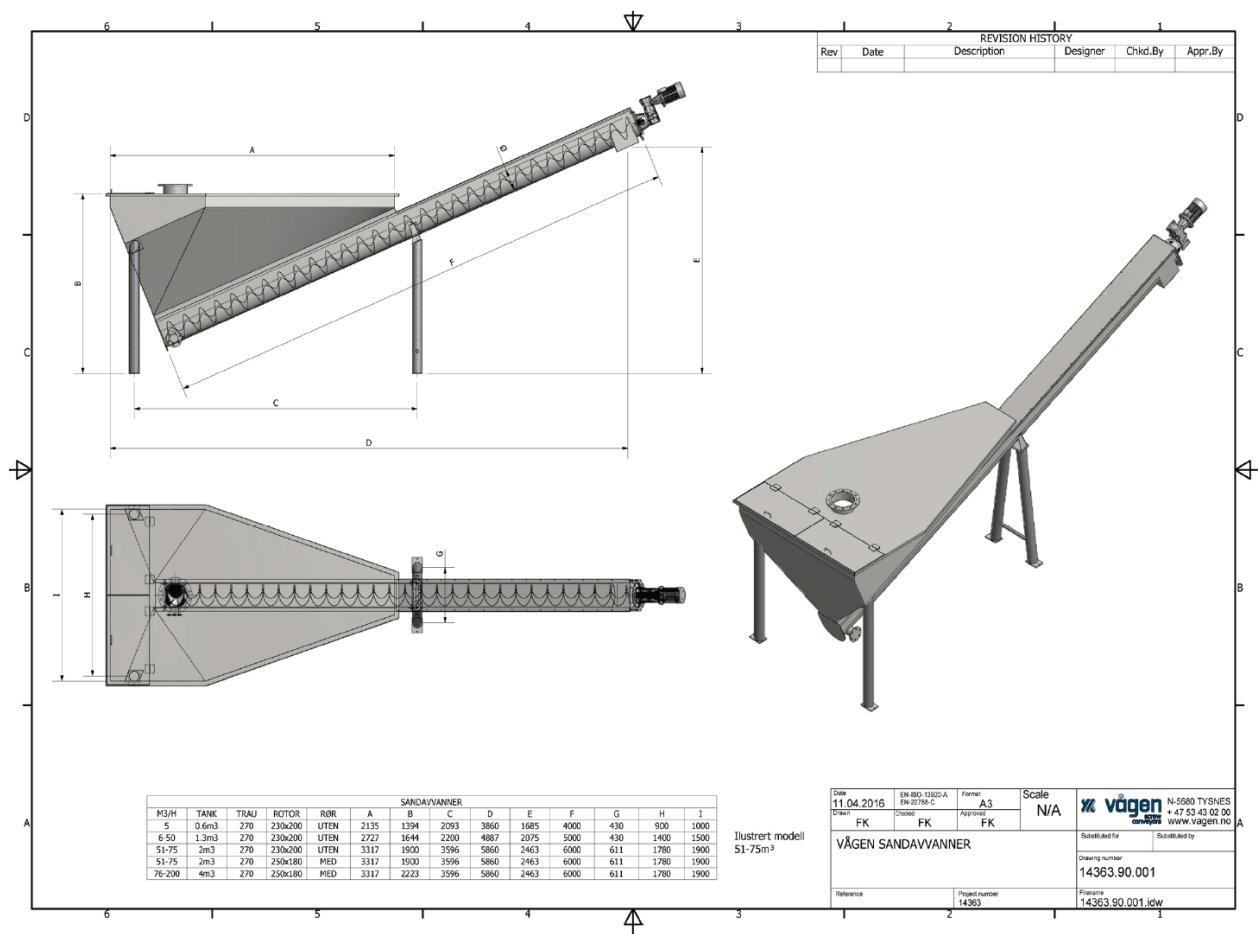

VÅGEN SAND SEPARATOR

Vågen AS provides solutions and machinery for wastewater treatment plants, sewage, and sludge water from various processes. In this context, sand separators play an essential role in extending the lifespan of other equipment that would quickly wear out if sand and small stones enter the process.

Proven technical solutions are used to reduce maintenance costs and simplify access to spare parts.

Excellent results are achieved across most industries.

Contact us for more information and technical clarification.

GENERAL INFORMATION

- Municipal water and wastewater systems
- Agriculture / fisheries treatment plants
- Slaughterhouses & dewatering systems
- Waste and recycling
- Milk/ meat processing plants
- Chemical factories
- Metal processing plants
- Laundry wastewater
- Biogas & composting plants
- Sand-containing wastewater
- Energy-efficient
- Complete control system available upon request
- Standard flanges on connections
- ATEX certification available if required
- From 5-200 m³ per hour
- Produced in stainless steel and food-grade approved materials (AISI304/AISI316) or other materials upon request
- CE marked and compliant with the Machinery Directive
- Sand separators built in containers are also available
