

Vågen Bucket elevator

Gear motor

SEW or others upon request

Material types

Galvanized steel, 304 and 316 can also be supplied

Bucket

Can be supplied in any material quality

Delivery time

12-14 weeks

Applications

Aqua culture
Recycling
Agriculture
Process industry

VÅGEN BUCKET ELEVATOR

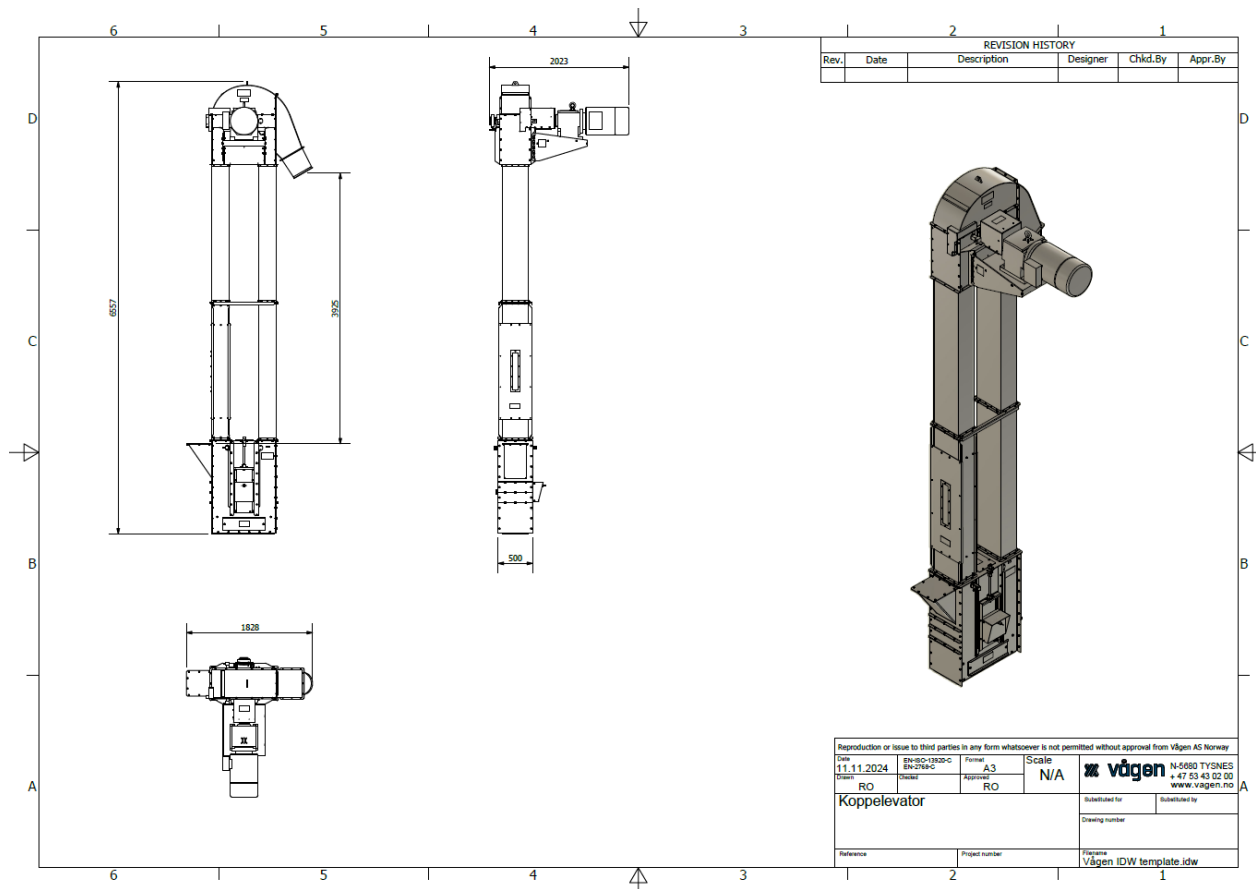

Our bucket elevators are delivered in a robust industrial design with heavy-duty industrial belts and self-cleaning bucket wheels as standard. This ensures efficient transportation of products within the grain and feed industry, breweries, mining, as well as granules from other industries.

The bucket elevators are widely used for transporting pellets in the aquaculture industry for gentle handling of the feed.

The bucket elevator can also be supplied with additional equipment for misalignment of the bucket belt, as well as a backstop brake, central air extraction, filters, bottom hoppers, explosion protection, and oil-and grease-resistant belts.

DIMENSIONS AND CAPACITY

TYPE	CAPACITY	LIFT HEIGHT	BELT WIDTH
E-type	1-1000 tons per hour	1-60 meters	150-1200 mm

GENERAL INFORMATION

- Standard components
- Energy-efficient drives from SEW Eurodrive with high quality
- Capacity up to 1000 tons per hour
- Lift height up to 60 meters
- Can be supplied with explosion protection system
- Can be supplied with service platforms and ladders
- Stocked spare parts
- System customizations
- CE marked and in accordance with the Machinery Directive
- ATEX certification available upon request
- Explosion protection and explosion-limiting system
- Air filter
- Belt scrapers and effective cleaning solutions
- Motor brake system also available
- Installation available upon request
- Control systems available upon request
