

Vågen Micro Shredder VMK1500

Gear Motor

SEW 1 x 1,5-7,5 kW
Other manufacturers available on request

Rotor

Stainless steel, AISI 316

Frame Structure

Stainless steel, AISI 316

Delivery time

12-14 weeks

Applications

Recycling
Slaughterhouses
Agriculture

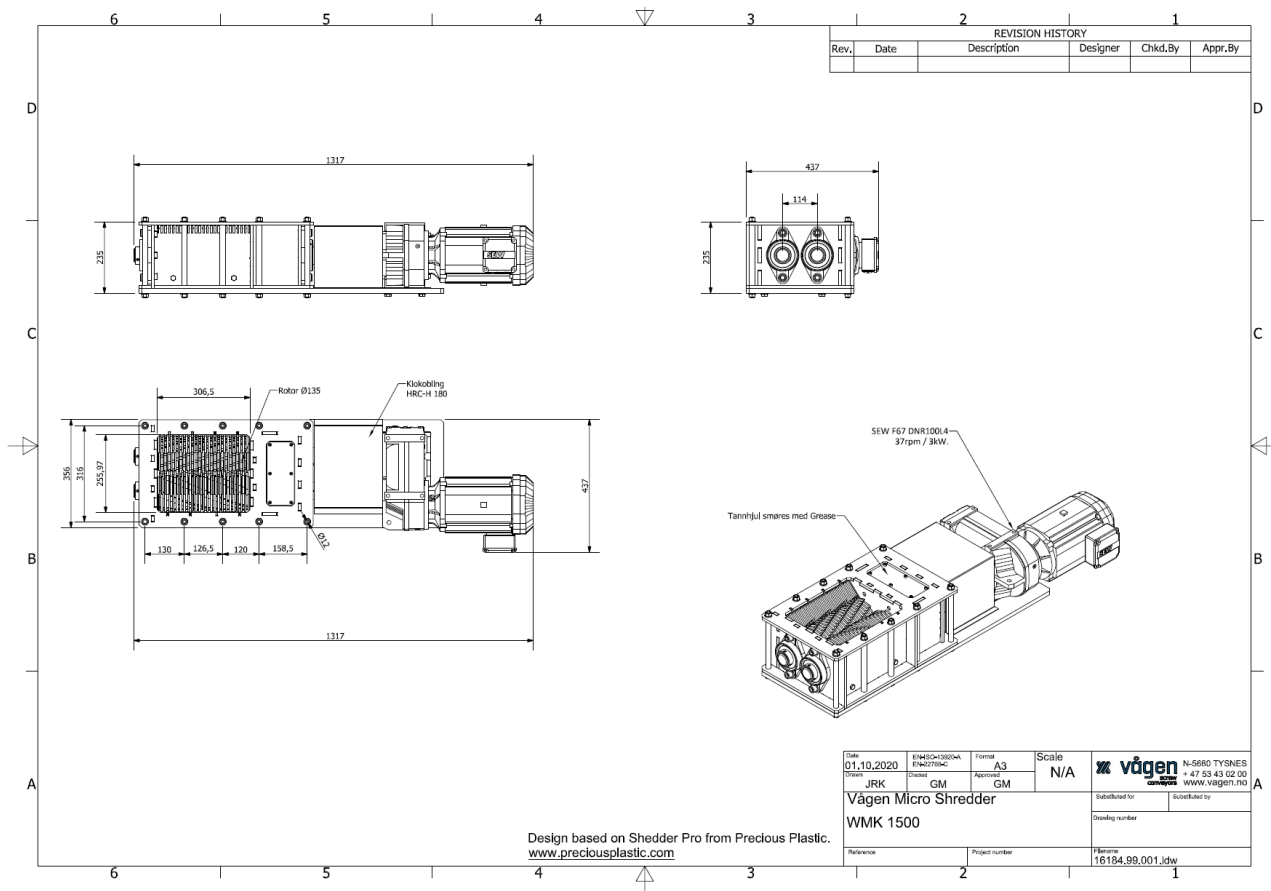

VÅGEN MICRO SHREDDER – VMK 1500

The VMK1500 is our compact micro shredder, ideal for applications such as salmon processing or other operations with lower capacity requirements. This machine can easily be customized to meet your specific needs, featuring changeable knives and spacing for optimal performance. The optional feed inlet tray with lid can also be supplied with an end switch as an optional safety feature.

The machine utilizes proven technical solutions that minimize maintenance costs and simplify access to spare parts.

We also offer complete start-up applications and control systems, including frequency converters for speed regulation and optimized operation-tailored to your specifications.

TYPE	INLET DIMENSION	POWER	CAPACITY
VMK 1500	306,5 x 256mm	1,5-7,5kW	0-1m³/h

GENERAL INFORMATION

- Standard components
- Energy-efficient drive units from SEW Eurodrive, high quality
- Shredder knives can be customized to your needs
- SKF bearings
- Replaceable knives
- Knives in AISI316, other materials available on request
- Spare parts in stock
- Acid-resistant stainless-steel frame
- System customized available
- Feed tray with lid and end switch available
- Conformity in accordance with the Machinery Directive 2006/42/EC
- Compact dimensions
- We customize feeding and discharge with trays, screws and rotary feeders
- If you need larger shredders, we can supply those as well
